

CERAMIC MEDIA SHAPES

Angle Cut Cylinders (22°, 45° & 60°)

Angle Cut Tristar

Cylindrical Wedge

Angle Cut Triangle 22°

Straight Cut Triangle

FORMULATIONS

Polish – No Abrasives. For burnishing and polishing. Surface finish is bright.

Light Cut – Bright finish with proper compound. Surface finish is good.

General Purpose – General finishing, deburring, deflashing and radiusing. Surface finish is good.

Fast Cutting – Provides a good finish with a tough, long wearing bond. Surface finish is good.

Extra Fast Cutting – For fast metal removal, surface improvement and matte finish. Surface finish is matte fine.

Dense Super-Fast Cutting – For high energy applications. Very fast cut. Deburr and radius faster than standard medias. Surface finish is matte.

Silicon Carbide – Good cutting and good wear. Surface finish is good.

Ultra Aggressive – Most aggressive media where metal removal, radiusing and cycle times are important. Surface finish is matte.

Cubic Foot Bulk Rate: 85 to 90 lbs
