## BALLS

## Eclipse

Round balls with slight flattening at the poles*. Available in sizes from 3/32" - 3/16".

* Precise roundness is not required for the majority of steel media finishing applications. Thus, two small flat spots at opposite poles are not objectionable. Pole-flattened balls are less expensive to manufacture and customers benefit from these economies through lower prices.
** All decimal dimensions are approximately $\pm .010$, with the exception that length of pins and diagonals are $\pm .020$.

## Abco

Round balls without flats for more critical finishing requirements.

## PINS

Tapering to pointed ends, pins reach into recesses and grooves, deflash through-holes and clean threaded areas.

BALLCONES
This design combines the burnishing abilities of balls and cones into one scientifically proportioned shape.

## ABCUT

Patented abrasive surface puts teeth into finishing for fast, heavy deburring, burnishing and material removal. Available in three standard sizes.

## DIAGONALS

Beveled edges of diagonally-cut ends provide effective finishing action in corners. Cylindrical body offers wide area contacts.

## Stainless Steel Available

Where complete freedom from rust is essential, we recommend 300 Series stainless steels. Most of these shapes are available in this corrosionresistant material.
